

Environmental Policy Statement

We recognise that our activities have the potential to create a detrimental effect on the environment. We are committed to minimizing our impact and ensuring environmental protection, encouraging recovery as far as is reasonable practicable.

It is therefore the policy of the Company to:-

- Use materials from sustainable or renewable sources wherever practicable and take care when ordering material to prevent excessive surplus.
- Reduce pollution and promote fuel and energy saving methods throughout our activities, particularly when purchasing new, or hiring equipment.
- Recycle materials where practicably possible and encourage all employees to support and comply with site waste management plans as determined by the Principal Contractor
- Encourage all employees to avoid and prevent environmental damage and likewise advise our clients accordingly.
- Comply with legal requirements
- Monitor the effects and review this policy at 12 monthly intervals

Within the organisation, arrangements will be made to submit environmental reports and discuss environmental matters at Management meetings. We shall set objectives annually to measure our performance.

Arrangements:-

- Van sharing – Reducing the carbon emissions released into the air through van sharing whereby only one van will be taken to site instead of two etc.
- Vehicle monitoring – monitoring the age of the company vehicles and purchasing new with lower CO2 emissions to reduce the amount of pollution generated.
- Site Waste Monitoring – Monitoring of the Site Waste Management Plans for waste produced and reduce landfill waste by reuse of materials/waste on other projects.
- Energy Saving – Use of low energy saving light bulbs, turning off lights when not required, turning off and shutting down of equipment on a daily basis.
- Complaints – All complaints will be reported to the contracts manager for the project in question, who will log the complaint and deal with/rectify the issue accordingly. The contracts manager will then inform the contracts director and company director through specific project meetings.

We shall monitor our environmental impact and discuss improvements during project review meetings.
